

## ALUMINIUM GUARDING

### Application

Design and manufacture of Aluminium safety screening, to prevent access to unauthorized personnel into a hazardous area. Guards are designed in compliance with BS EN953. Guards can be measured on site or manufactured from customer drawings.

### Construction

Guards are constructed from 45 x 45 extruded Aluminium sections bolted together. Panels are infilled with 2mm folded solid sheet panels, 6mm polycarbonate or varying mesh aperture sizes of 50 x 50, 40 x 40 or 75 x 12.5.

### Interlocks

Electrical or mechanical interlocks can be provided to ensure access is only possible when the machine is in a safe condition.

### Finish

Self colour, with mesh or sheet metal infills polyester powder coated in a colour of your choice.
