JSA Just Swing Aside Milling M/c Guard

The JSA-1E Interlocked Vertical milling machine guard is suitable for Bridgeport Series 1 milling machine or similar.

Its operator friendly proximity guard provides operator protection with out the usual constraints of a full table guard. When not required it simply **Just Swings Aside** allowing full operator access to the table for setting and measurement, etc.

Not only is it suitable for tool room machines, but also R & D workshops, prototype work and small batch production machines. It has a three sided sheet metal framed polycarbonate screen with support arm and mounting bracket with a standard right hand side cut out for access to quill feed arms (common to Bridgeport machines) Also available has left hand version or full screen with no cut outs. Adjustment is easily attainable in both Z and T axis

Option: Can be supplied as opposite hand version
