

ANGEL MODULAR GUARDS

Application

Design and manufacture of modular safety guards, to prevent access by unauthorised personnel into a hazardous area. Guards are designed in compliance with BS EN953. Guard lines can be decided via a site measure or by overlaying our guards onto customer CAD drawings for approval.

Construction

Guards are constructed from 50 x 25 heavy duty mesh panels, mounted on 76 diameter round tube with optional fascia for aesthetics.

Interlocks

Electrical or mechanical interlocks can be provided to ensure access is only possible when the machine is in a safe condition.

Finish

Guards are polyester powder coated in a colour of your choice.
