

## ANGEL MODULAR GUARDS

### Application

Design and manufacture of modular safety guards, to prevent access by unauthorised personnel into a hazardous area. Guards are designed in compliance with BS EN953. Guard lines can be decided via a site measure or by overlaying our guards onto customer CAD drawings for approval.

### Construction

Guards are constructed from 2mm folded sheet steel and/or polycarbonate for viewing and protection, mounted on 76 diameter round tube with optional fascia for aesthetics.

### Interlocks

Electrical or mechanical interlocks can be provided to ensure access is only possible when the machine is in a safe condition.

### Finish

Guards are polyester powder coated in a colour of your choice.
