

Access Platforms

Application

Design and manufacture of access platforms and small mezzanine floorings. For pedestrian access or as machine operators platform. All platforms are designed in accordance with the latest relevant standards.

Construction

Platforms are constructed from a range of steel sections, to suit the application and size. Fixed or moveable options are available, if space is an issue. Non slip flooring and stair treads can be specified.

Finish

All steelwork is galvanised and/or polyester powder coated in a colour of your choice.
