

MACHINE TOOL GUARDS

Application

Design and manufacture of machine tool guards for safety, swarf and coolant containment and aesthetic appeal.

Guards are individually designed to suit the customers' standard machine bases, and in compliance with BS EN953.

Construction

Guards are constructed from sheet metal with steel, polycarbonate or laminated glass infill, depending on operators' visual / safety requirements. Sealed sliding, hinged or rise and fall doors are designed to optimise access & withstand regular usage.

Interlocks

Electrical or mechanical interlocks can be provided to ensure access is only possible when the machine is in a safe condition.

Finish

Guards are polyester powder coated in a colour of your choice.
