

Application

Custom-designed, localised, close-fitting guards that prevent maintenance technicians from coming into contact with moving hazards in the lift machinery room.

Full service

Site surveys, risk assessments, discussions with stakeholders, user-friendly and standards-compliant designs, manufacture and installation. For urgent projects we provide a very fast turnaround of two weeks from enquiry to installation.

Construction

Mild steel with punched apertures or welded wire mesh for visibility. Sections needing to be removed for access are fitted with the minimum number of captive fasteners. Polyester powder coated finish.

Experience and expertise

Over 30 years' experience providing bespoke passenger lift machinery guards that achieve the necessary level of protection but without hindering inspection and maintenance.

Compliance

Our lift machinery guards meet these standards and others as appropriate:

| |
|--|
| BS EN ISO 12100 (risk assessment and risk reduction) |
|--|

| |
|--|
| BS EN ISO 14120 (general requirements guards) |
|--|

| |
|------------------------------------|
| BS EN ISO 13857 (safety distances) |
|------------------------------------|

In addition, the guards will normally be CE Marked as 'safety components' in compliance with the Machinery Directive.
